

# DELMONT PRIVATE HOSPITAL PSYCHIATRIC REGISTRAR PROGRAM

Delmont Private Hospital is a leader in providing private mental health care. For over 50 years, Delmont has delivered continuous, consistent quality care that supports individual needs within the community.

Delmont has an extensive range of services, including Overnight and Inpatient Services, Day Group Therapy Programs and Outpatient Consulting Suites.

We welcome Stage 3 Psychiatry Trainees (including overseas trained) to complete their training here at Delmont. **The Hospital has established a clear and supported pathway to commence private practice at Delmont upon completion of training.**

## About the role:

Delmont provides the rare opportunity to conduct registrar training experience in a private setting.

There are training positions available for:

- Advanced Aged
- Generalist Adult
- Substance Use and Addiction

Each role includes working with high-prevalence disorders, voluntary patients, and patients receiving ECT and TMS. **There is no on-call or after-hours work required.**

The registrars have supervisors that support them by providing positive experiences and real mentorship. This position is a unique opportunity for anyone interested in private practice since no public hospital employs registrars.

This role is most suited for stage 3 trainees in their last 6-24 months of training and are interested in transitioning to private work as a consultant upon completion of training.

**Delmont is the place to complete your training and stay to start your practice.**
